

## PRODUCT DATA SHEET

## Double-sided Acryl KB adhesive tape

To ensure that the building's shell is air and windtight, the membranes or panels used must be permanently sealed at overlaps, joints, connections and penetration points.

### FIELD OF APPLICATION

- Adhesion of adjacent vapour barriers and retarders
- Adhesion of adjacent roof membranes and wind seals
- Connections and joints on wood, OSB and metal
- for adhesion on masonry, use primer if necessary

### ADVANTAGES

- tear-resistant
- high adhesive properties

### AVAILABLE IN THE FOLLOWING DIMENSIONS

Roll width	20 mm	40 mm
Roll length	50 m	50 m
Colour		transparent
Carton	32 Rollen	16 Rollen

### PRODUCT DATA

Material composition	Double-sided adhesive tape of pure acrylic and fabric with white covering.
Thickness	0,2 mm
Colour	Transparent
Temperature resistance	-40 °C - 120 °C
Working temperature	-5 °C
Age resistance	30 years
Storage	2 years, cool and dry

## Double-sided Acryl KB adhesive tape

### INFO

Materials used must be free from dust and grease and the substrates must be dry and stable. The greater the pressure applied, the better the tape's adhesion.

The double-sided acrylic tape functions as a seal and not a tight-fitting connection. The pure acrylic adhesive used does not contain resins or other additives that may lead to brittleness of the adhesive layer and is therefore very age-resistant.
