

## Technical data sheet

# AIRSTOP DUO KB

The double-sided adhesive tape AIRSTOP DUO KB is the ideal installation aid for fast, safe and reliable fastening of membranes to a wide variety of constructions.

## Advantages

- speeds up assembly
- tear-resistant
- very high adhesive properties

## Available dimensions

Article number	Roll width	Roll length	Colour	Carton
3ADU020	20 mm	50 m	Transparent	15 rolls
3ADU040	40 mm	50 m	Transparent	7 rolls

## Field of application

- Installation aid for vapour barriers
- for adhesion on masonry, use primer if necessary

## Technical data

Material composition	Double-sided adhesive tape of pure acrylic and fabric with white covering	Thickness	0.4 mm
Temperature resistance	-40-120 °C	Working temperature	-5 °C
Colour	Transparent	Age resistance	30 years
Storage	2 years, cool and dry		

# AIRSTOP DUO KB

## Info

Materials used must be free from dust and grease and the substrates must be dry and stable. The greater the pressure applied, the better the tape's adhesion. The double-sided acrylic tape functions as a seal and not a tight-fitting connection. The pure acrylic adhesive used does not contain resins or other additives that may lead to brittleness of the adhesive layer and is therefore very age-resistant.
