

PRODUCT DATA SHEET

OMEGA AB Aluminium Tape

To ensure the air and wind-tightness of a building's shell the membranes or sheeting materials used must be permanently sealed at overlaps, gaps, joints and penetrations areas. OMEGA AB Alu Tape has a tear-resistant backing of aluminium/polyester composite membrane coated with bitumen adhesive with excellent bonding properties which is also age-resistant and UV-resistant.

FIELD OF APPLICATION

- used as repair tape in the roof area
- a seal and repair for gaps, guttering, flashing at eaves and valleys as well as ventilation and drainage pipes and connections
- for doorstep joints outdoors

ADVANTAGES

- strong adhesion
- backing strips
- UV-resistant

OMEGA AB Aluminium Tape

INFO

The materials used must be free from dust and grease and substrates must be dry and supporting.

OMEGA AB Aluminium Tape has the function of sealant and not of a strong connector. Optimum adhesion to the substrate is achieved in combination with BUBI LF Adhesive Primer or with UNI primer.

(!)

Butyl and bitumen tapes have a high inherent weight. The tape must be mechanically secured in case of installation in projecting areas e.g. ceilings, cantilevers and soffit areas, where gravity acts directly on the tape.
