

# OMEGA VLIES corner

This is a prefabricated moulded part that can be used specifically for quick processing of external and internal corners in combination with PoBit sealing paste.

## Advantages

- Fast processing

## Field of application

- Detailed solution for external and internal corners

## Recommended products

OMEGA PoBit Reinforcement Tape

OMEGA PoBit Sealing Compound

## Available dimensions

Article number	Angled corner length	Carton content
30MVECKEA	150 mm	25 pieces
30MVECKEI	150 mm	25 pieces

## Technical data

Material composition	PES needle felt	Thickness	0.55 mm
Colour	White	Specific weight	110 g/m <sup>2</sup>

# OMEGA VLIES corner

## Reinforcement OMEGA PoBit sealing paste

OMEGA VLIES corners are used in geometrically complex connection situations and facilitate the processing of the reinforcement layer of OMEGA PoBit sealing paste. The OMEGA VLIES corners are embedded into the still fresh OMEGA PoBit sealing paste over the entire surface and then completely covered with a second coat so that the fleece is no longer visible. For further reinforcement, the processing guidelines for OMEGA PoBit sealing paste must be observed.
