GUIDELINES FOR THE USE OF **OMEGA** SD10 VAPOUR BARRIER

APPLICATION

Installation: position on the sheathing with the printed side facing upwards (UV-resistant side). Attach to the wooden subframe using a tackler.

Overlaps and edge joints: min. 10 cm overlap — this is marked on the OMEGASD10 SK DUO Vapour Barrier with green dotted lines.

Using sufficient pressure press together the acrylate strip of one length and the appropriate two-way adhesive strip of the other length. AIRSTOP Sealant SPRINT or OMEGA QUILLI should be used for an airtight seal at joints.
