

## ADVANTAGES

- good adhesion to many substrates
- ready to use

# Adhesive Paste 3300

conglutination of EPDM stripes and Butylrubber on numerous undergrounds, such as PVC, acrylic glass, SVS, RVS, stone, concrete, gas concrete, lead, wood, bituminous undergrounds and on itself. The adhesive connection stays elastic and waterproof. After drying the connection is temperature resistant up to 80° C.

## AVAILABLE IN THE FOLLOWING DIMENSIONS

Container	600 ml hose
Carton contents / hoses	12

## PRODUCT DATA

Composition	Polymer based highly viscous adhesives with little dis-solvent amount
Colour	black
Storage	12 months unopened; cool and dry

## GUIDELINES FOR USE

Undergrounds must be clean, fat and oil-free and dry; and if necessary they shall be preconditioned with the Primer 9900. Wet undergrounds have to be dried first. Apply adhesive and insert foil within a minute. Press the foil with a roller on the underground. If the foil does not stay in position till the adhesion is dried a contact connection was possible. Here the foil is taken off again and put back in position after short drying. Again press the foil with a roller on the underground.
